MPOnline Internship 2.0

Become Industry Ready. Get Paid to Learn

Software Engineering & AI Foundation Internship Program

Real Projects | Practical Skills | On-Job Training

- Designed for Students & Freshers
- Get job-ready with real experience

- **Total Seats: 100 (Strictly Merit-Based)**
- **Program Duration: 5 Months**
- **Last Date to Apply: 18 March 2026**

About MPOnline ***INTERNSHIP PROGRAM*** (2.0)

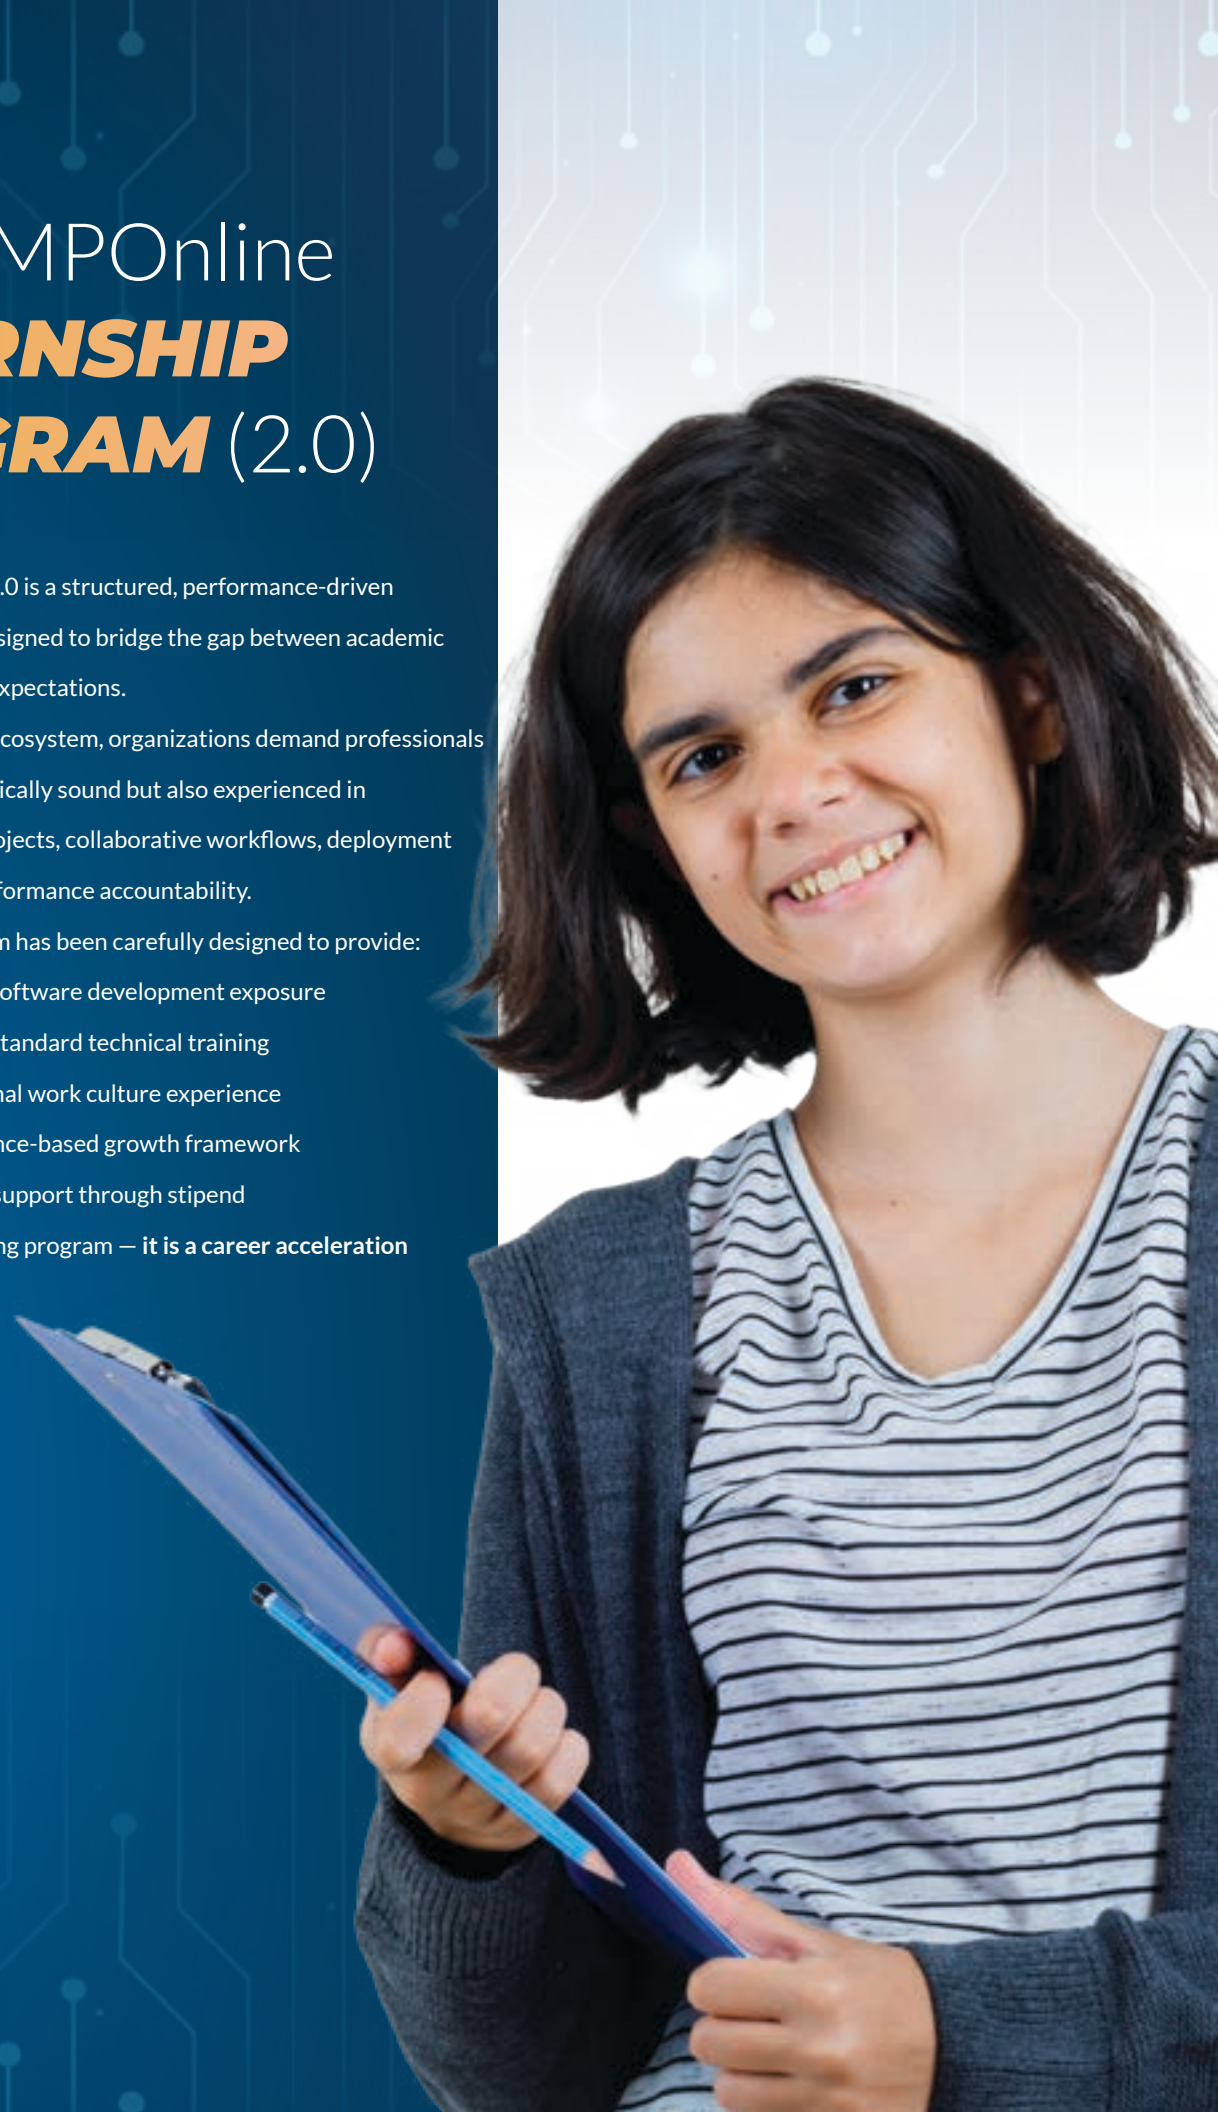
MPOnline Internship 2.0 is a structured, performance-driven internship initiative designed to bridge the gap between academic learning and industry expectations.

In today's technology ecosystem, organizations demand professionals who are not only technically sound but also experienced in handling real-world projects, collaborative workflows, deployment environments, and performance accountability.

This internship program has been carefully designed to provide:

- Practical software development exposure
- Industry-standard technical training
- Professional work culture experience
- Performance-based growth framework
- Financial support through stipend

It is not merely a training program — **it is a career acceleration platform.**



Why this Internship **MATTERS**

Most graduates face three major challenges:

- Lack of practical exposure
- Limited understanding of real corporate workflows
- Absence of industry-grade project experience

MPOnline **Internship 2.0** directly addresses these gaps by combining structured learning with live project implementation.

" Interns do not just learn — they build, deploy, collaborate, and deliver."

Vision of the **PROGRAM**

To create a new generation of industry-ready software professionals equipped with:

- Modern development skills
- Artificial Intelligence capabilities
- Enterprise application expertise
- Real-world project exposure
- Professional discipline & accountability

Program **OVERVIEW**

Stipend
12,000/-
Monthly

Program Duration
5
Months

Registration Fee
1500/-
Only

Last Date to Apply
18 March 2026

Total Seats
100
(Strictly Merit-Based)

This limited-seat model ensures quality mentorship, focused supervision, and performance monitoring.

Certification & ***Career Impact***

Upon successful completion, interns will receive:

- Official MPOnline Internship Certificate
- Experience Recognition
- Enhanced Resume Value
- Strong Project Portfolio
- Real Industry Work Exposure

Top-performing interns may receive mentor recommendations for future career opportunities.

Who Should ***Apply?***

- Students seeking practical exposure
- Fresh graduates aiming for IT careers
- Candidates aspiring to enter AI & Software roles
- Individuals wanting real industry experience before full-time employment

Core Program **PILLARS**

On-Job Training Model

Interns operate in a structured professional environment similar to corporate technology teams.

They experience:

- Daily task allocation
- Code reviews
- Performance tracking
- Team collaboration
- Reporting structures

Live Industry Projects

Participants work on real software modules and digital platforms.

They gain exposure to:

- Requirement analysis
- Development cycles
- Testing environments
- Database integration
- Deployment processes

Mentor-Guided Professional Development

Every intern is assigned experienced technical mentors who guide them through:

- Code optimization
- Best practices
- Debugging strategies
- Architecture planning
- Career counselling

Structured & Industry-Aligned Curriculum

The curriculum has been designed in alignment with modern software industry standards and emerging technology demands.

Technical Curriculum Framework

React – Advanced Front-End Engineering

Interns will master:

- Component-Based Architecture
- React Hooks & State Management
- API Integration
- Responsive UI Development
- Performance Optimization
- Front-End Security Basics

Artificial Intelligence & Machine Learning

AI is transforming industries. This module introduces practical AI implementation.

Coverage includes:

- Python for AI/ML
- Data Cleaning & Preprocessing
- Supervised & Unsupervised Algorithms
- Model Training & Validation
- Performance Evaluation Metrics
- Basic Deployment Concepts

.NET – Enterprise Application Development

Enterprise systems require scalability and security.

Interns will learn:

- C# Programming
- ASP.NET Core
- MVC Architecture
- RESTful API Development
- SQL Database Integration
- Authentication & Authorization Systems

PHP & Laravel – Backend System Development

Dynamic web applications require robust backend systems.

Interns will gain expertise in:

- Core PHP & OOP
- Laravel Framework
- Database Architecture
- Session Management
- Web Security
- Application Deployment

Learning Methodology

The program follows a 5-stage learning model:

- Conceptual Understanding
- Guided Practical Sessions
- Real Project Assignment
- Code Review & Mentor Feedback
- Performance Evaluation & Improvement

Performance Evaluation System

Interns are evaluated on:

- Technical capability
- Code quality
- Problem-solving skills
- Team collaboration
- Professional conduct
- Task completion efficiency

Selection **PROCESS**

To maintain program excellence, the selection process is structured and transparent.

Eligibility Criteria

Applicants must belong to one of the following academic backgrounds:

- BCA
- MCA
- B.Tech (Any Stream)
- BSc (CS/IT)
- MSc (CS/IT)

01 Registration & Payment of Registration fee

02 Merit-Based Shortlisting (Academic and profile screening)

03 Technical Assessment & Document Verification

04 Final Selection Announcement

05 Offer Letter Issuance

06 Internship Commencement

Apply Before 18 March 2026

Build Skills. Gain Experience. Secure Your Future in Technology.
